

ArtisticThreadworks – Diane Dillon

Breast Cancer Ribbons

Applique

Supplies

- Heat N Bond Lite
- Fabric for Applique
- Small Craft Iron
- Washaway/Tearaway Stabilizer
- Scissors for Trimming

Instructions

1. Load design into your machine.
2. Red indicates a placement line – it is not meant for you to thread your machine with red thread.
3. Blue indicates the tack-down line. Again it is not meant for you to thread your machine with blue thread.
4. Thread your machine with the first color AFTER red & blue.

5. Hoop stabilizer into your 4x4 hoop and secure on machine.
6. Stitch the placement line.
7. Add *Heat N Bond Lite* to the back of your fabric for applique. Remove paper backing.
8. Place your fabric entirely over the placement line.
9. Stitch the tack-down line. Trim excess fabric away from the tack-down line. Be sure to trim as closely as you can.
10. Remove hoop from machine but DO NOT UNHOOP. Use a small craft iron to fuse applique fabric to backing fabric.
11. Continue working through your design until finished. Be sure to follow the sequence of the worksheet provided with the design.
